Data Dictionary: Prevention Agenda 2013-2017 Tracking Indicators: County Baselines and State Targets

KEY TO FORMAT:

N – Numeric

A – Alphanumeric (character)

Note: This file is not in fixed-width format. Field size is set to accommodate the longest entry in any given data column.

Field Number	Field Name	Field Size	Format	Format note	Description
1	County Name	20	Alphanumeric	Text	Full county name
2	Priority Area Number	1	Numeric	Integer	Prevention Agenda priority area ID number
3	Priority Area	120	Alphanumeric	Text	Full title for the specific Prevention Agenda priority area
4	Focus Area Number	1	Numeric	Integer	Prevention Agenda focus area ID number (focus area within priority area)
5	Focus Area	120	Alphanumeric	Text	Full title for the specific focus area
6	Indicator Number	4	Alphanumeric	Text	Unique indicator identifier
7	Indicator	200	Alphanumeric	Text	Full text description of the health tracking indicator
8	Event Counts	12	Numeric	Integers with commas	Event counts for rate computations (numerators)
9	Average Number of Denominator	12	Numeric	Integers with commas	Denominator for rate computations
10	Measure Unit	12	Alphanumeric	Text	Result type, rate or percentage
11	Rate/Percentage	12	Numeric	Numeric with decimal	Numerical indicator value estimate
12	95% CI	12	Alphanumeric	Text	95% Confidence Intervals for percentage estimates from survey data
13	Data Comments	100	Alphanumeric	Text	Indicate when the county data is unstable or suppressed due to small number of events
14	Quartile	20	Alphanumeric	Text	Quartile(s) that indicator estimate falls within
15	New York State Baseline	12	Numeric	Numeric with decimal	Baseline value for the health tracking indicator
16	2017 Objective	12	Numeric	Numeric with decimal	Target value for the health tracking indicator, as specified by the Prevention Agenda
17	Objective Region	12	Alphanumeric	Text	Region of NYS that the objective pertains to
18	Data Years	100	Alphanumeric	Text	Time period for raw data used in indicator computation
19	Data Sources	300	Alphanumeric	Text	Data sources for the raw data used in indicator computation
20	Mapping Distribution	1	Numeric	Integer	Grouping of county rates for color shades in the map (value of "1" indicates the best group and "3" indicates the worst group)
21	Location	30	Alphanumeric	Lat/Long coordinates separated by a comma, within parentheses	Lat/Long decimal degree coordinates for the region covered by the indicator, for use in mapping
