Benefits of Releasing Hospital Inpatient Discharges (SPARCS De-identified)

- Providers (Hospitals and Physicians) will be able to compare their performance on key indicators across hospital, hospital region and statewide.
- Researchers will be able to perform "upper level" analysis to evaluate whether further data is necessary for a research topic.
- NYS residents will be able to review treatment, hospital usage and disease patterns at the provider, regional and statewide level.
- Discharge level data is provided to assess the quality of care at New York State Hospitals.
- Assists hospitals, agencies, and health care organizations with decision and monitoring of inpatient services.
- Assists hospitals, agencies, and health care organizations with developing and evaluating health care policies.
