

Health Home Quality Measures: Beginning 2013 DATA DICTIONARY

**OQPS
10/01/2017**

Health Data NY

Field Name	Definition
Measurement Year	Represents the evaluation year.
Health Home Name	Name of Health Home certified by NYSDOH.
Health Home MMIS ID	A unique identification number for each Health Home.
Domain	General field quality measure applies to.
Subdomain	More specific field area quality measure applies to.
Measure Description	Description of quality measure.
Measure	Name of quality measure.
Age Category	Represents the age grouping that each result belongs to.
Denominator	Number of persons meeting denominator criteria.
Rate	The rate is the numerator divided by the denominator, multiplied by 100. Measures PQI-92 and PPR are multiplied by 100,000. If denominator is less than 30, small sample size (SS) is reported.
Level of Significance	Indicates whether the rates are significantly better or worse than statewide average or sample size too small to report (denominator less than 30).
Indicator	Indicates if lower rate is better.
