

## Managed Long-Term Care Performance Data 2014 - Data Dictionary

Column name	Type	Description
Measurement Year	NUM	Enrollment year
Measurement Period	CHAR	Represents the period during which the enrollees are assessed
Dataset	CHAR	January 1 – June 30
Program Type	CHAR	One of the three models of MLTC plans
Plan ID	CHAR	A unique identification number for each plan
Plan name	CHAR	Name of the MLTC plan certified as of November 2014 by NYSDOH to enroll Medicaid recipients
Measure	CHAR	Name of MLTC measure (See Table NYSDOH_MLTC2014_Measures.docx for further details)
Category	CHAR	Represents one of the four categories (descriptive, utilization, satisfaction, or quality) that each measure belongs to.
Type	CHAR	Type of statistical test
Denominator	NUM	Number of persons meeting denominator criteria
Result	NUM	If the type is mean the result represents the average. If the type is prevalence, risk-adjusted prevalence, risk-adjusted composite prevalence or statewide prevalence, the result represents the rate which is the numerator divided by the denominator
Significance indicator	CHAR	Indicates whether the rates are significantly higher or lower than statewide average, sample size too small to report, or data not available
Percentile 50th	CHAR	50% of plans have a rate above this value
Percentile 75th	CHAR	25% of plans have a rate above this value
Percentile 90th	CHAR	10% of plans have a rate above this value
