Managed Long-Term Care Performance Data - Data Dictionary

Column name	Type	Description
Measurement Year	NUM	Represents the evaluation year.
Measurement Period	CHAR	Represents the period during which the enrollees are assessed.
Dataset	CHAR	Represents the evaluation period.
Program Type	CHAR	Indicates MLTC plan model.
Plan ID	CHAR	A unique identification number for each plan.
Plan name	CHAR	Name of the MLTC plan certified by NYSDOH to enroll Medicaid recipients.
Measure	CHAR	Name of MLTC measure. (See Measures document for further details about MLTC measures included in the appropriate measurement year.)
Category	CHAR	Represents the category (descriptive, utilization, satisfaction, or quality) that each measure belongs to.
Type	CHAR	Type of statistic.
Denominator	NUM	Number of persons meeting denominator criteria.
Result	NUM	If the type is mean the result represents the average. If the type is prevalence, risk-adjusted prevalence, statewide prevalence, over-time, or risk-adjusted over-time, the result represents the rate which is the numerator divided by the denominator.
Significance indicator	CHAR	Indicates whether the rates are significantly better or worse than statewide average, sample size too small to report, or data not available.
Percentile 50th*	CHAR	50% of plans have a rate below this value.
Percentile 75th*	CHAR	75% of plans have a rate below this value.
Percentile 90th*	CHAR	90% of plans have a rate below this value.

*Percentiles reported in Health Data NY are based on all MLTC plans and may not reflect the percentiles used to calculate the MLTC Quality Incentive.
